

UPPER CERVICAL CHIROPRACTIC CARE

A Unique Alternative Health Care Solution

Upper Cervical doctors focus their efforts on locating and removing misalignments of the first two bones in your neck that may be the **cause** of your health condition.

Upper Cervical Care Quick Facts

- An upper cervical correction is gentle.
- There is no forceful pulling, twisting or jerking motion of your neck.
- The correction is applied using a precise and controlled touch that allows the head, neck, and spine to return to their proper positions

Common Conditions

As upper cervical doctors, do we treat diabetes, migraines, fibromyalgia, etc.? No. Legally, we can't even say we treat conditions. Upper cervical doctors treat the body. We correct the cause of the problem. We don't treat the problem. That's the problem with the health care system today, so much time is spent chasing symptoms, chasing diseases, when all healing resides within you. And if we can just remove the interference in that healing process, then the body will heal on its own. That's what upper cervical is all about.
